

Solution-06

Interest on Loan = 6% p.a. (As partnership deed is silent)

$$\text{Interest on Sita's Loan} = 30,000 \times \frac{3}{5} \times 6\% \times \frac{6}{12} = ₹ 540$$

$$\text{Interest on Geeta's Loan} = 30,000 \times \frac{2}{5} \times 6\% \times \frac{6}{12} = ₹ 360$$
